BTech - Bachelor of Technology, Mechanical Engineering

Sai Ganapathi Engineering College, Visakhapatnam.

📅 03/2015 - 04/2018

PROJECTS

QuickCam

Description & Responsibilities:

- ProManager's Quick Cam is a mobile application where users can capture a short video clip, bitmojis, snaps with multiple features.
- Implemented the Gift Cards feature in ProManager's QuickCam app, rewarding subscribers with gift cards at different levels. Users can either share these gift cards with friends or use them to extend their premium subscription for access to premium features.
- Developed the Gift Cards feature by leveraging in-house React.js components and the Tamagui library for enhanced functionality.
- Developed and managed the Gift Cards concept in the app, by creating a variety of gift card options using React Native.
- Implemented a user-friendly interface for purchasing and redeeming gift cards.
- Played a key role in leading the development of Infinity Bonus, a reward program integrated into ProManager. This innovative system rewards users with monthly gift cards when they purchase any plan from our diverse range of offerings.
- Focused on API development for Infinity Bonus, utilizing Nest.js to create robust APIs.

ZkPoker Game UI Development

Description & Responsibilities:

- Contributed to the development of ZkPoker, a poker game based on the Texas Holdem model.
- Utilized React and React Native for UI development.
- Responsible for crafting the game's user interface (UI) using various libraries like Tamagui and some in-house React.js components.

OutLaw Hide Out

Description & Responsibilities:

- Collaborated on the integration of the ZkPoker game into the OutLaw Hide Out website, aligning with client specifications.
- Designed the UI for the "Outlaw Hide Out" landing page, enabling users to track their owned NFTs (non-fungible tokens).
- Responsible for implementing the display of non-fungible tokens (NFTs) retrieved from the API, as well as other UI-related tasks within the project.

ExperienceHub-AI

Description & Responsibilities:

- Developed an in-house project allowing users to access various AI models, including text-to-text generation and text-image generation, and different engines in one unified platform.
- Initiated the project by creating wireframes using draw.io.
- Collaborated on building multiple components and screens based on the wireframes.
- Primarily focused on the UI development and implemented an API using OpenAI API to create a chatbot-like text-to-text generation model screen.
